This brochure will introduce you to Lincoln Steel Buildings from “the ground up” starting with the framing of the building all the way to the roof and finally the trim. We also discuss some of the building's benefits, such as affordability and Do-It-Yourself construction. We offer comparisons to Lincoln’s competition on pages 12 through 17 with warranties and color selections rounding out the contents. You will be able to view Lincoln steel buildings throughout the publication in a variety of color options. The Lincoln website and contact information are available for your convenience. Call today and start to make your Lincoln steel building a reality.
Lincoln buildings have a hot-dip galvanized steel frame. All primary and secondary framing members are zinc coated and outperform inferior paint primers used by other manufacturers. Our zinc galvanizing process prevents rust and ensures a long life-cycle of performance.

Lincoln buildings are designed with a patented easy bolt-together connection technology, which complements a sturdy bracing system.
Lincoln steel buildings come with a 40-year limited warranty on AZ55 Galvalume® roof panels, a limited lifetime warranty on stainless steel capped roof fasteners and a 40-year limited warranty from the paint manufacturer on the siliconized polyester colored coating on the sidewall panels and trim.

Galvanized secondary framing and extended weather-tight PBR roof panels are standard on all Lincoln steel buildings.

**Optional Gutter System**
Contour design efficiently controls drainage from rain and snow.

**Corner Trim**
1 1/4" deep rigid-rib design construction results in beauty and strength.

**Base Trim**
Provides maximum weather protection, an attractive finished appearance and long life due to a galvanized base angle and unique design.
Roof Panels
Rigid-rib panels are designed for long-life and pre-cut to building dimensions.

Ridge Cap With Peak Box
Factory formed for easy installation.

Ridge Cap
Factory formed for easy installation with a PBR design roof.

Cut-Away View
Showing roof panels, wall panels, purlins, rafter and sidewall column.

Framed Openings
Overhead doors can be mounted without the need for additional steel or hardware.
Lincoln PBR sidewall panels come in seven popular colors with a 40-year limited warranty against chipping, cracking, flaking or peeling. The paint has a siliconized polyester finish with a substrate galvanized coating beneath the paint providing further protection against rust.

The sidewall panels are continuous from floor to eave and meet or exceed required wind loads. These panels are 26-gauge as standard. Optional accessories are also available and include: translucent wall panels, service doors, fixed or operable wall louvers, windows and framed openings.

All sidewall panels utilize screws that come assembled with neoprene washers. The washers eliminate the potential for rust by preventing damage to the sheeting, such as cracking paint due to overtightened screws. The heads of the screws are painted to match the color of the sheeting. They will not rust, tarnish or turn black.
AZ55 Galvalume® is an aluminum/zinc coating, which protects the roof sheeting of a Lincoln building against rust. It requires no maintenance or painting to retain its original luster and is comprised of 55% aluminum, 44% zinc and 1% silicone. The AZ55 roof panels have a high aluminum content providing superior protection against rust and backed by a 40-year limited rust-through perforation warranty. In addition, the self-drilling roof fasteners are stainless steel capped and come fully assembled with a self-sealing neoprene washer for a weather-tight seal and a limited lifetime rust warranty.

Lincoln roof panels are 26-gauge high-tensile steel with a corrugation depth of 1-1/4". The Purlin Bearing Rib (PBR) roof system provides a full overlap, which means Lincoln buildings are weather-tight, even under extreme conditions.

Optional roof accessories include translucent skylights, round gravity ventilators, 9" or 12" sectional or continuous ride vents and curb/flashing units.
J trim and base trim are included with your building to provide a finished appearance as well as added protection against leaks and the possibility of rodent and insect infestation. Foam closures further ensure against leaks at the door openings. Jamb and header covers for use around door openings complete the trim package. Trim and cover material are supplied at no additional charge and enhance the functionality and beauty of your building. Trim is available in four complementary colors.
Lincoln pre-engineered steel buildings are designed and manufactured by industry experts who focus on value, strength, durability and easy construction for the first-time builder. Our durable clear span structures provide years of maintenance-free service at a price that is thousands of dollars below alternative methods of construction. Lincoln buildings are ideal for garages, workshops, storage facilities, commercial applications and a variety of light industrial uses.
In place of heavy welded beams, Lincoln buildings use light-weight high performance, bolt-together components that do not require a crane, heavy equipment or special tools to construct. You can erect your building in as few as three days with the help of family and friends, saving the unnecessary expense of hiring contractors or renting special tools.
All Lincoln buildings are made in America, by American workers and with 100% American made quality steel. Lincoln Steel Buildings combines superior quality materials, skilled craftsmanship and cutting-edge technology in a state-of-the-art manufacturing facility to produce each pre-engineered steel building system.

From our patented frame system to the finest hardware available, Lincoln delivers each building to your location as a complete package ready to build.

Compare Lincoln's features and benefits and you will see why Lincoln buildings are the best value on the market today.
Warranties

Lincoln Steel Buildings stands behind their product with a full array of warranties. The company confidently offers warranties for several reasons.

The design of each Lincoln steel building meets or exceeds IBC requirements and is in compliance with ASTM and MBMA standards. Industry experts pay very careful attention to local codes, including wind and snow loads. This ultimately provides added value to the customer in a maintenance-free product designed to last a lifetime.

High quality materials coupled with skilled craftsmanship reflect excellence built into every Lincoln steel building. The use of stainless steel capped fasteners, a superior precision paint coating along with galvanized girts and purlins keep these steel buildings looking like new for decades.

- 40-Year Limited Paint Warranty
- 30-Year Limited Chalking and Paint Color Change Warranty
- Stainless Steel Capped Fasteners with a Limited Lifetime Warranty
- 40-Year Limited Rust-Through Perforation Warranty on AZ55 Galvalume® Roof Panels

Paint Colors

Lincoln buildings are precision coated with Valspar paints, a leading producer of paint, finishes and synthetic resins for industrial applications. Choose from 7 panel, 4 trim and 2 roof colors.

* Printed colors are matched as closely as possible. If you require an exact color match, please ask us for a paint sample.
